Summary

Data analyst with 3 years of experience supporting data-driven projects in academic and small business environments. Skilled in SQL, Python, Excel and Tableau, with hands-on experience developing statistical reports, automating processes and delivering insights for internal teams and external clients. Proven ability to translate complex data into clear visualizations and presentations that drive decision-making.

Education

Sam Houston State University <i>BBA, Management Information Systems</i>	Huntsville, TX December 2024
---	---------------------------------

Relevant Coursework: Demonstrated skills using Microsoft Access, Python, and Java. Analyzed and optimized system processes while documenting team collaboration.

Experience

Sam Houston State University <i>Data Center Operations Specialist</i>	Huntsville, TX May 2025 - Current
---	--------------------------------------

Created a Power BI dashboard to monitor datacenter telemetry. Set up and automated API data tunnel with Power BI and DCE. Managed and maintained dataset integrity. Extracted and cleaned data to run statistical reports for data analysis. Frequent cross department communication and collaboration. Managed documentation and work assignment using Team Dynamix. Performed maintenance on enterprise Dell servers and flashed Linux and Windows OS. Set up device's networking and hardware configurations on boot. Utilized DNS to allocate addresses for devices.

Small Business Development Center <i>Business Analyst (Intern)</i>	Huntsville, TX Jan 2023 – Jun 2024
--	---------------------------------------

Supported business process and improved efficiency through entry-level SAP software. Coordinated data driven projects focused on cost reduction, customer satisfaction, and user accessibility. Thoroughly documented all research and decision-making processes for a final customer presentation. Delivered finish product and simplified complex terminology to stakeholders.

Projects & Skills

Data Cleaning Project (Café Sales)
Deleted duplicate values. Identified types of missing data and imputed data using a variety of techniques.

Exploratory Analysis Project (OLIST Sales)
Used SQL CTEs to build and execute complex queries such as a linear regression model for trend analysis. Extracted insights from the data to present solutions and recommendations.

Data Visualization Project (OLIST Sales)
Connected and prepared data. Utilized proper type of visualization. Created an effective dashboard design with interactivity.

Programming/Software: SQL, Excel, Tableau, Python, MS Access, Power BI, Power Query, Basic ML and LLM

Other: Data Analysis, IT Documentation, Statistics
