Summary

Data analyst with 3 years of experience supporting data-driven projects in higher education, small business environments, and retail. Skilled in SQL, Python, BI tools, and AI support with hands-on experience developing statistical reports, automating processes and delivering insights for internal teams and external clients.

Education

Sam Houston State University Huntsville, TX
BBA, Management Information Systems December 2024

Relevant Coursework: Demonstrated skills using Microsoft Access, Python, and Java. Analyzed and optimized system processes while documenting team collaboration.

Experience

Sam Houston State University Huntsville, TX
Data Center Operations Specialist May 2025 - Current

- Created a Power BI dashboard to monitor datacenter telemetry.
- Set up and automated API data tunnel with Power BI and DCE.
- Managed and maintained dataset integrity. Extracted and cleaned data to run statistical reports for data analysis.
- Frequent cross department communication and collaboration.
- Managed documentation and work assignment using Team Dynamix.

Small Business Development Center Huntsville, TX
Business Analyst (Intern) Jan 2023 – Jun 2024

- Supported business process and improved efficiency through entry-level SAP software.
- Coordinated data driven projects focused on cost reduction, customer satisfaction, and user accessibility.
- Thoroughly documented all research and decision-making processes for a final customer presentation.
- Delivered finished product and simplified complex terminology to stakeholders.

Men's Wearhouse Conroe, TX
Team Lead Sep 2022 – May 2025

- Led daily business operations, coordinating staff activities, customer service, and inventory management.
- Analyzed sales activity and customer review to find trends and make informed decisions regarding future focus. Supported process improvement by reviewing and identifying recurring issues.
- Coordinated multiple priorities in a high-volume environment while maintaining business needs and completing objectives.

Projects & Skills

Data Cleaning Project (Café Sales)

Deleted duplicate values. Identified types of missing data and imputed data using a variety of techniques. Created a starting point for clean analytics to be performed.

Exploratory Analysis Project (OList Sales)

Presented useful and actionable insights based on extracted trends. Used SQL CTEs to build and execute complex queries such as a linear regression model for trend analysis. Modeled data schema and transformed extracted dataset. Utilized clear visualizations. Created a dashboard for marketing to quickly view important KPIs and metrics using real time data.

Programming/Software: SQL, Excel, Tableau, Python, MS Access, Power BI, Power Query, Power Apps, Basic ML and LLM

Other: Data Analysis, IT Documentation, Statistics
